CUSTOM LUXURY BATHROOM FEATURING LARGE-FORMAT 24” × 48” MARBLE-LOOK TILE INSTALLATION

Tile Installation Description

The bathroom features a precision tile installation using large-format 24” × 48” marble-look porcelain tiles on both walls and floors.

The layout is carefully planned to maintain continuous vein alignment, creating a seamless and visually balanced finish throughout the space.

Walls are installed with tight, consistent grout joints and perfectly leveled surfaces, ensuring a clean and uniform appearance.

The floor installation follows the same alignment, with proper slope and transitions for durability and function.

The shower area includes a fully waterproofed system, with wall tiles precisely cut around fixtures and edges for a clean, professional finish.

The shower floor is completed with small-format mosaic tiles, allowing for accurate pitch toward the drain and enhanced slip resistance.

All edges, corners, and transitions are executed with attention to detail, delivering a high-end result that combines durability, waterproof performance, and refined aesthetics.
